#### Note

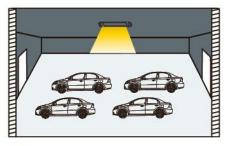

- 1. "N/A" means not available.
- 2. Detection area is effected on volume of motion object and motion speed. The detection area is tested by a 170cm height person and walking speed is 0.3m/s.

## 3.Function

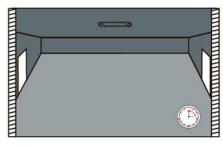

#### **On/OFF Function**

With sufficient ambient light, the light will not be switched on even if with motion signal.

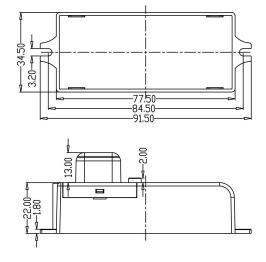

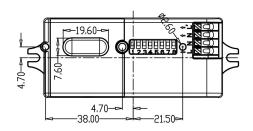

With insufficient ambient light, the sensor switches on the light when motion is detected.

3 After elapse of hold time, the sensor switches off the light when no motion is detected.

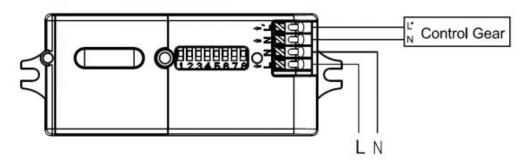

# 4. Dimension (mm)

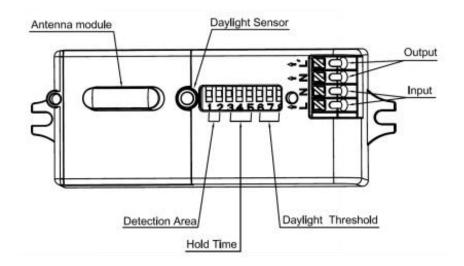

# 5. Wiring

\*The sensor is designed for connect one load only. Connect more than one loads may damage the sensor.

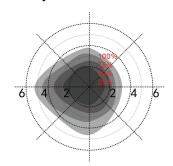

#### 6. Structure

#### 7. Radiation Pattern

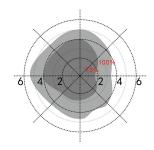

#### 1) Ceiling mounting

Ceiling mounted height: 3m Sensitivity: 100%/75%/50%/25%

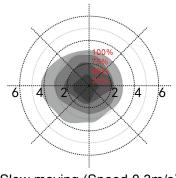

Normal moving (Speed:1m/s)

Ceiling mounted height: 6m(\*) Sensitivity:100%/75%

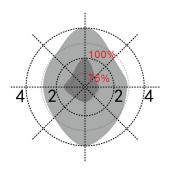

Normal moving (Speed:1m/s)

Slow moving (Speed 0.3m/s)

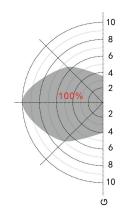

Slow moving (Speed: 0.3m/s)

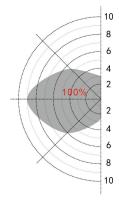

\*Only 100%/75%detection sensitivity is workable when installed at 6m mounting height. 25%/50% sensitivity is not able to detect motion signal.

#### 2) Wall mounting

Horizon mounted height: 2m Sensitivity: 100%

Normal moving (Speed: 1m/s)

Slow moving (Speed 0.3m/s)

# 8. DIP Switch Setting

Detection Area (Sensitivity)

	1	2
100%	ON	ON
75%	-	ON
50%	ON	-
25%	-	-

#### Hold Time

	3	4	5	
I	ON	ON	ON	58
II	-	ON	ON	30S
III	ON	-	ON	90\$
IV	-	-	ON	5min
V	ON	ON	-	20min
VI	-	-	-	30min

#### **Daylight Threshold**

	6	7	8	
I	ON	ON	ON	2Lux
II	ON	ON	-	10Lux
III	-	ON	-	30Lux
IV	ON	-	-	50Lux
V	-	-	-	Disable*

<sup>\*</sup>Disable" means the daylight sensor not work. it will turn on light once motion is detected regardless of ambient light .

#### 9. Override Function

Quick switch ON/OFF 3 times within 2sec to override sensor function. Lights will switch on all the time. Power off and on again to recover sensor function.

#### 10. Initialization

After power on, the sensor automatically turns on light at 100% brightness. After 10sec, it turns off the light. During the initialization, the sensor is not able to detect movement.

# 11. Factory Setting

Detection area: 100%, Hold Time: 5S, Daylight Sensor: Disable

## 12. Application Notice

- 1) The sensor should be installed by a professional electrician. Please turn off the power before installing, wiring, changing the setting of the DIP switch.
- 2) The sensor which installed in the plastic and glass lampshade will reduce the sensitivity. For every 3mm increase in thickness, the sensitivity will be reduced by 20%.
- 3) The light sensitivity threshold is in a sunny environment, no shadow and ambient light diffuse reflection. Ambient lux level will be different in different environment, weather, climate, time-of-day and season.
- 4) The parameters of the sensor may need to be reconfigured in different installation environments.
- 5) This sensor is for indoor use only. It will affect the waterproof effect for outdoor use. Wind, rain, and moving objects around will cause false triggering.
- 6) The distance between any inductive sensors should be greater than 3m.
- 7) Do not place the sensor close to high-density objects such as metal, glass, concrete walls, etc, false triggering could happen. When the sensor is installed in a metal lamp, metal reflective surface, or a narrow enclosed environment, the microwave will be reflected repeatedly and cause false triggering. Please reduce the sensitivity or contact the manufacturer for technical support.
- 8) Please ensure that there are no moving signals around the sensor, such as fan,DC motor, sewer pipe, air outlet, etc., the sensor may generate false trigger.
- 9) You are advised to test 5 samples before mass application of sensor in a new lighting project.
- 10) Due to continuous improvement, the contents of this instruction could be changed without prior notice.
- 11) If the sensor is built under metal board ,make sure the sensor surface should to be seamless close to the metal plate without space .
